NEWSPAPER

**Gen. Taylor on Dealing.**  
The Washington correspondent of the N. Y. Express says that "among the good things considered upon by the Cabinet Council, and one which the investigation of security has been recommended, is the official determination that every officer of the Army and Navy, and every man connected with the civil service of the Government, shall be removed from office if he engages in a duel." "Old Zack" says he served in the Army for forty years, and that he never fought a duel. "For the reason that nobody but a blackguard would want to fight a duel," he says, "and for the reason that a gentleman, and such a fellow would not be worthy of notice, and not worth the powder which it would take to shoot him, even if there were moral guilt in the acts of honorable murder."

**The St. John Courthouse.** A full account of the recent destructive fire in that city reached us by due course of mail, yesterday. It states that the number of persons rendered homeless and dependent by this fire is two thousand. They have mostly lost all they possessed. It seems that the ground upon which the fire occurred was leased and almost entirely covered with small dwellings without yard room, and approached only through narrow alleys. Many of these dwellers have been without employment during the whole of this severe winter and are now left despondently dependent upon the bounty of the city and private charity. They have been allowed to shelter themselves in the public buildings. Active measures have been adopted to get up subscriptions in their behalf among the wealthy citizens of St. John. Many of the buildings fronting on the principal streets, as George street, Union street, Mill street, Smyth street, etc., which were burnt were two or three stories high. No lives were lost.

**The Hotel in Greenville.** owned by Messrs Shaw & Hinkley was totally destroyed by fire on Thursday last. The furniture was saved and the house was insured at the office of the Somerset Mutual Company.

**The Skowhegan.** Clarion states that a little boy the son of Mr. John Folen of Skowhegan fell into a well, 20 feet deep, a few days since. He descended head foremost, and remained in that position until his mother descended upon the stones and rescued it from its perilous situation.

**The storm last night.** changed from rain to snow and the walking this morning is exceedingly uncomfortable. The mail has not arrived, and we are without news from that source and the interruptions of the telegraph wires yesterday prevented our getting the accustomed dispatch.

**Mr. Hopkins' Juvenile Concert.** will come off this evening at Market Hall. The little folks are fully prepared by numbers and long drill to get up something really graceful and attractive—in an innocent and beautiful entertainment, worthy of attention.

**The N. H. Patent.** concerns the election of Mr. Tuck by about 300 majority, and that of Gen. Wilson by about 200.

**Mr. Webster appears to be old Zack's right hand man in the Senate.**

**Hon. Hannibal Hamlin** reached his home in Hampden, on Tuesday.

**More about the Lamps!**  
The Boston Traveller of Monday, contains a letter from San Francisco, January 20, 1949, and remarks that there is no reason to doubt its authenticity. The letter was written as a satire in Boston.

The writer has been in the gold diggings where he suffered ill health, and slept on the ground and under sheltering rocks, but he got what he sought, for he says—

"As for gold, I have got, I have got plenty! I have got about 700 pounds. I was there for 12 to 15 dollars the ounce. I was in the diggings for months and a half, and I had had something to wash out the dirt clean, I should have got as much again, for we can get nothing near all of it out. I have a number of pretty large pieces—one piece weighing five pounds."

I want you to come out here, you can get just as much gold as you want. I know where there is a ledge, that is almost solid gold, but I shall not tell any body, nor work at it till my friends come out. I found it out by one of the Indian Chiefs, whose life I saved, when he was about to be murdered. A great many are killed, and nothing is said about it.

The excitement was so great, that every body has been digging gold, and every one has got a plenty of gold. Living here is now two dollars a day. It has been ten dollars.

I shall leave for the diggings some time in March, and stay until August, when I hope to see you and all the rest of my relations. There is gold enough for all the boys and girls, the whole New England State, and I wish they were all here. But it is time enough yet, and there is gold and silver enough. I hope we shall have a mine here, so that we can get the work of our gold.

Bring out some good boots, that will draw two or three feet of water. Take a tin you, thick clothing, and flannel shirts. Bring some good garden seeds and all sorts of vegetables. I have been in a portion of the country, about which there is not much known, and where there is plenty. Grapes and other fruits grow in abundance. There was once a settler there, but he was not a person living—there are ruins there of an old church, and that is very old. You can make out that it was a church, and that is all.

I can get along with the Indians first rate. Only be kind to them, and you can do anything with them. I could tell you ten times as much more, but I have filled my sheet. You can look for yourself. I have only to say—Come, come one and all. I shall look for you in August. Yours, Geo. W. Morrill.

**Mexican Claims Commissioners.**  
The appointment of three such men as Geo. Evans of Maine, Caleb B. Smith of Indiana, and Gov. Charles Fane of Vermont, to be Commissioners to investigate and adjudicate the claims of our citizens for Mexican Spoils, assumed by our Government as a part of the purchase money of New Mexico and California, is calculated to give universal satisfaction. So strong a Commission has rarely been constituted, and the responsibilities imposed on it require the highest order of character and ability. We trust that all will accept, though we know that they will do so with reluctance.

**Shipping and Freight.**  
There is a great demand for shipping in the port at the present time, and liberal freight rates are being offered. A great quantity of lumber and other products are being shipped, and the convenience to other markets. We will thank our exchange agents if they will draw the attention of ship owners to the state of affairs here. Wilmington (N. C.) Commercial, March 15.

**An announcement** made in any part north of Mason & Dixon's line.

The will of a habitual drunkard, according to a recent decision of the Supreme Court, is not valid unless it is made in the presence of a competent witness, and the will of a habitual drunkard is not valid unless it is made in the presence of a competent witness.

**Col. Jones, of New Orleans,** a son-in-law of Col. Jones, has been appointed Secretary of the Commission under the Mexican treaty.

**Notice to the Public, and Instructions to Postmasters.**  
Relative to the Rating of Letters, see Remuneration of Dead Letters, Transient Newspapers, and the Postmarking of Letters conveyed by the British and United States International Mails.

Hereafter, when a letter exceeds an ounce in weight, but does not exceed three ounces, it will be rated with four charges of single postage; when it exceeds two ounces, but does not exceed three, it will be rated with six charges of single postage for the first half ounce, a double charge for the first ounce, and two additional charges for each succeeding ounce, or fraction of an ounce, beyond the first ounce. This is ordered in virtue of the act of Congress approved March 2, 1849.

And in pursuance of the same act it is required that letters which are refused at the office of delivery, by the parties addressed, and letters which, for any other cause, cannot be delivered to the parties addressed, shall be immediately returned to the Postmaster General in Washington, under address to the Third Assistant Postmaster General, without waiting the time for delivery, and so heretofore required in relation to this class of dead letters. They must in every case be marked in red ink on the face, with an entry showing they are refused, or the cause that prevents their delivery, and stamped with the date of office, and with a view to the proper adjustment of the accounts, be placed under post paid to the Dead Letter Office.

Transient newspapers (not newspapers sent from the office of publication) will be returned to the subject in virtue of the act aforesaid, to the general newspaper postage rate only, that is, one cent for any distance in the same State, and one and a-half cent for any distance exceeding one hundred miles, where the newspaper is sent from one State into another. But postage on such newspapers is in all cases to be prepaid, as heretofore.

In respect to British mails, where the official postage entries on the letters received are in red ink, the letter is to be considered as paid, and is to be delivered accordingly, where in black ink, the postage is to be collected, or wholly unpaid. The postage figures on such letters show, on the paid letters, the amount to be credited to the United States, on the unpaid letters, the amount charged to the United States. The postage to be collected from unpaid British letters is in all cases to be whatever may be due for debt, twenty-four cents when single, and an additional twenty-four cents for each additional rate, and after the first one cent, each letter exceeding that weight is to be charged 49 cents for each additional ounce or fraction of an ounce.

**J. COLLIVER, Postmaster General.**  
Post Office Department, March 15, 1849.

**State of Arms and Ammunition to California Emigrants.**  
The Hon. George W. Crawford Secretary of War, has published the following notice—

**WAR DEPARTMENT, March 11, 1849.**  
The following Regulations will govern in issuing arms and ammunition under the resolution of Congress approved March 2, 1849.

1. Each applicant must file with the War Department an affidavit that it is his bona fide intention to migrate to Oregon, or California or New Mexico as the case may be, and must state distinctly what arms and ammunition he requires.

2. On receipt of an application and affidavit, as above stated, a sufficient supply of the arms and ammunition designated by him, to arm and equip each applicant, may be delivered to him or his designee, on payment of the cost thereof, provided the Government has such arms and ammunition on hand, and that the applicant may receive such other arms and ammunition as he shall select on the same conditions.

3. Arms and ammunition furnished as above will be delivered to each applicant, or to his authorized agent at the nearest or most convenient arsenal where the arms may be. The place of delivery, declared by the applicant should be designated.

**Trial for Riot.**  
Some half dozen of our countrymen were arraigned for rioting and disturbing the public peace, on the evening of the 22nd ult. The trial came on at the Western District Court, and will be continued to day. The excitement in regard to the trial, and the large attendance, filled the court room with spectators.

**The Culture of Fruit Trees.**  
At a recent agricultural meeting held in Boston, the Hon. Marshall P. Wilder spoke, as follows—

"The Culture of Fruit Trees, or in modern language the science of Pomology, is a subject of great importance to our country, and one which should be cultivated by every citizen. The subject would engross more time than is allotted to our meetings during any one session of the Legislature. The grain and vegetable of the earth may be considered as the necessary and more substantial blessings of Providence, but the fruit of the tree is the luxury of the orchard and the pleasure of the table, and it is the duty of every citizen to contribute to the health and the gratification of the people, and to the prosperity of the country, by the cultivation of the tree."

It is the duty of every citizen to contribute to the health and the gratification of the people, and to the prosperity of the country, by the cultivation of the tree. The fruit of the tree is the luxury of the orchard and the pleasure of the table, and it is the duty of every citizen to contribute to the health and the gratification of the people, and to the prosperity of the country, by the cultivation of the tree.

It is the duty of every citizen to contribute to the health and the gratification of the people, and to the prosperity of the country, by the cultivation of the tree. The fruit of the tree is the luxury of the orchard and the pleasure of the table, and it is the duty of every citizen to contribute to the health and the gratification of the people, and to the prosperity of the country, by the cultivation of the tree.

It is the duty of every citizen to contribute to the health and the gratification of the people, and to the prosperity of the country, by the cultivation of the tree.
